PROFESSIONAL SUMMARY

MBA candidate (Digital Transformation & Innovation) at National Taipei University of Technology with an International Business background. Hands-on experience in B2B market research, structured data analysis with SQL and Excel, and Taiwan–Vietnam cross-border business. Interested in industry and company research across the semiconductor and AI infrastructure sectors.

EDUCATION

1. MBA (Concentration: Digital Transformation & Innovation) | Taipei, Taiwan
National Taipei University of Technology (NTUT) | September 2026 – Expected June 2028
2. Bachelor's in International Business Administration | Taichung, Taiwan
Providence University | Sep 2022 – Jun 2026 | GPA: 3.7/4.3
Relevant coursework: Corporate Finance, Accounting, Business Research Methods, International Trade.

WORK EXPERIENCE

Business Development & Telesales Intern – 渡邦通關物流, Taiwan | Wuqi, Taichung | Jan 2025 – Jul 2026
• Conducted B2B market research on Vietnamese prospects and compiled a structured prospect database to support Taiwan–Vietnam cross-border logistics services.
• Generated 20+ qualified leads within the first two months; managed follow-up communications and responded to client inquiries.
Interpreter – Taiwan Ministry of Education Programs | Providence University | Part-time (2022–2026)
• Provided Chinese–Vietnamese interpretation and administrative support for international student delegations of 10–20 participants, covering procedures, cultural orientation, and documentation.
Teaching & Event Assistant | Providence University | Part-time (2022–2026)
• Supported 30+ academic events through logistics, guest check-ins, attendance records, and technical setup.
• Provided real-time Chinese–Vietnamese–English interpretation during lectures and workshops.

SELECTED BUSINESS & DATA ANALYTICS PROJECTS

GitHub Portfolio: github.com/baronguyen67
E-commerce Sales & Customer Behavior Analysis | SQL Server (T-SQL), DBeaver
• Analyzed 23,935 sales records (10,695 orders, 9,133 customers) using SQL to evaluate purchasing patterns, repeat-purchase behavior, and revenue trends.
• Found that repeat customers (13.2% of buyers) generated a disproportionate 28.7% of revenue.
Customer Segmentation & Product Performance Analysis | SQL Server (T-SQL), DBeaver
• Segmented 17,415 customers (25,728 orders) with SQL and RFM segmentation to compare purchasing behavior across customer groups.
• Identified 3,065 "Champion" customers and compared segment and product performance.
